THE NEW ZEALAND JOURNAL OF AGRICULTURE.

VOLUME XXXI.
(July - December 1925.)

INDEX.

A.

Abortion, contagious, of cattle, 71.
Abortion in cows, 66.
Acidity-reduction in cream for butter-making: The use of bicarbonate of soda, 1.
Acmena florabunda tree, scale on, 136.
Actinomycosis, 285.
Agricultural clubs, boys' and girls', 237.
Agriculture Department's farms and experimental areas, 274.
Agricultural education in New Zealand: Report of the Board of Agriculture, 240, 313.
Agricultural shows, forthcoming, 278, 350, 420.
Albany Experimental Area: Notes on operations, season 1924-25, 383.
Angora goats for blackberry-control, 9.
Annual sheep returns as at 30th April, 1925, 276.
Answers to inquiries, 66, 135, 202, 269, 343, 412.
Apiary, the (monthly notes), 59, 130, 196, 263, 338, 406.
Apple-canker, incidence of, in New Zealand, 102.
Apples, varieties of, exported in 1925 season, 70.
Arran Victory potato, 140.
Artichokes for pig-feeding, 203.
Artificial farmyard manure, trials with, at Lincoln, 256.
Ashburton Experimental Farm: Notes on operations, season 1924-25, 152.
Ashburton light lands, dairy pasture for, 137.
Aston, B. C.—Mineral elements in the feeding of stock, 352.

B.

Batt, W. G.—Faulty cream due to stagnant water, 311.
Baumé hydrometer, use of the, in wine and cider making, 29.
Bicarbonate of soda, use of, for acidity-reduction in cream, 1.
Blackberry: Cane-wilt attacking, 301.
Blackberry-control by goats on hill-country, 9.
Blackberry investigation, 411.
Black currants, manuring, 67.
Blackleg in 1924-25, 321.
Books received, 65.
Botanical analysis of pasture at Winton Experimental Area, 107.
Bovine tuberculosis, 272.
Boys' and girls' agricultural clubs: Taranaki-Wanganui District competitions, 1924-25, 237.
Breeding - ewes, chaff - and - mangold ration for, 67.
Bronzewing turkey gobblers, demand for, 196.
Brown, F. C.—
Poultry-keeping (monthly notes), 56, 128, 194, 336.
The rearing and fattening of geese, 182.
Brown - beetle, spraying fruit - trees against, 135.
Brown-top seed, harvesting, 345.
Bulbs, pests in imported, 312.
Bush-burn grass mixture, a North Auckland, 413.
Bush-fellings, 401.
Butter and cheese gradings, 139.
Butter, export, water-content of, 184.
Butter, preservatized and non-preserved, 157.
Butter packed in "four-one" boxes, effect on, of projecting staples, 31.
Butterfat in milk, variations in the percentage of in milk, 110.

C.

- Calving of dairy cows, 269.
 Campbell, J. A.—
 Standardized rules for judging show fruit, 13.
 Stationary spraying plants for the orchard, 279.
 Cane-wilt attacking blackberry, 301.
 Carbon bisulphide, revised prices for, 206.
 Case of pigs sucking heifer, 134.
 Cattle, genital diseases of, 71.
 Cattle-tick, the, 342.
 Certificates on seed-exports to Canada, 419.
 Cheese and butter gradings, 139.
 Cheese, high-grade, and the British market, 395.
 Cider, 278.
 Citrus-culture (monthly notes), 55, 17, 193, 403.
 Clovers, strawberry, subterranean, and suckling, 346.
 Cockayne, A. H.—
 Hill-country grassland in the North Island, 80.
 Tractor versus six-horse team in Canterbury, 149.
 Compensation for stock and meat condemned, 148.
 Competitions, farmers' field-crop, 120, 178.
 Concentrates for dairy cows, 68.
 Concrete work on the farm: Paths, floors, and troughs, 286.
 Condition of hides: Losses by faulty branding and flaying, and dehorning, 396.
 Contagious abortion of cattle, 71.
 Contagious abortion in cattle, precautions against, 271, 414.
 Contagious mammitis of cows: Interim report on trials with reputed preventive vaccines, 159.
 Control of grain-weevil: A farmer's experience, 207.
 Convolvulus, destroying among fruit-trees, 345.
 Cook, J. G.—
 Branding, weighing, and booking of wool-bales, 333.
 Lambing-pens, 124.
 Co-operative dairy companies and their shareholders, 167.
 Couch-infested pumice land, pasture-establishment on, 137.
 Cows, drying off, 204.
 Cream, acidity-reduction in, for butter-making, 1.
 Cream, faulty, due to stagnant water, 311.
 Crop areas and yields: Seasons 1923-24 and 1924-25, 418.
 Cultivation of fuller's teasle, 185.
 Cunningham, G. H.—
 Cane-wilt attacking blackberry, 301.
 Incidence of apple-canker in New Zealand, 102.

D.

- Dairy companies, co-operative, and their shareholders, 167.
 Dairy Division—
 High-grade cheese and the British market, 395.
 Preservatized and non-preservatized butter experiment, 157.
 Testing of purebred dairy cows, 186.
 Water-content of export butter, 1924-25, 184.
 Dairy factories, average grades of, 31.
 Dairy factories in New Zealand, 1925, 70.
 Dairy-herd testing in New Zealand: Review of the 1924-25 season, 209.
 Dalgliesh, C. S.—Waimaunga Experimental Farm: Notes on operations, season 1924-25, 228.
 Deem, J. W.—
 Boys' and girls' agricultural clubs: Taranaki-Wanganui district competitions, 1924-25, 237.
 Farmers' field-crop competitions, 178.
 Stratford Demonstration Farm, 172.
 Deer and wild-pig nuisances, 23.
 Deterioration of Crown lands in mid-western districts of the North Island: Investigation and report by special committee, 36.
 Dreadnought wheat, 153.
 Drugs and instruments for dairy farm, 374.
 Duck-rearing, 194.

E.

- Earp, E. A.—
 The apiary (monthly notes), 59, 130, 196, 338.
 The wax-moth and its control, 26.
 Education, agricultural, in New Zealand, 240, 313.
 Education in agriculture, university, 387.
 Effect of projecting staples on butter packed in "four-one" boxes, 31.
 Eggs and egg-pulp in cold storage, 208.
 Eggs, exportation of, 56.
 Electric power transmission poles: Supplementary notes on eucalypts, 20.
 Ellis, A. F.—Nauru and Ocean Islands phosphate, 143.
 Elphick, E. E.—Internal parasites of sheep, 98.
 Ensilage-pits, hillside, 331.
 Entomological Conference, the Second Imperial, 371.
 Eucalypts for electric-power transmission-poles, 20.
 Experiments on manuring of rape in Canterbury, 308.

F.

- Farm, the (monthly notes), 52, 122, 189, 257, 331, 399.
- Farms and experimental areas, Agriculture Department's, 274.
- Farmers' field-crop competitions—
Mauku and Patumahoe districts, 120.
- Taranaki-Wanganui districts, season 1924-25, 178.
- Fat-lamb raising: An outline of New Zealand methods, 226.
- Faulkner, A. J., the late, 114.
- Faulty cream due to stagnant water, 311.
- Fawcett, E. J.—Goats and blackberry-control on hill country, 9.
- Feeding, winter, of milking cows, at Otaki Sanatorium Farm, 181.
- Fern-root and burnt bones for pigs, 344.
- Fertilizers, quarterly importations of, 139, 347.
- Fertilizers for raspberries, 204.
- Fescue, Chewings, 356.
- Fields Division—The farm, 52, 122, 189, 331.
- "Flowering-currant," the, and cross-fertilization, 271.
- Foot and mouth disease, incidence of, 394.
- Foster, L. D.—Testing of New-Zealand-grown wheats, 296, 375.
- Foul-brood combs, sterilization of, 264.
- Foy, N. R.—Chewing's fescue: History, seed-production, and seed-export problems, 356.
- Fruit, show, standardized rules for judging, 13.
- Fuller's teasle, cultivation of, 185.

G.

- Geese, the rearing and fattening of, 182.
- Genital diseases of cattle: Temporary sterility and contagious abortion, 71.
- Gillies, C. L., and Hilgendorf, F. W.—Notes on some manurial experiments in Canterbury and Otago, 220.
- Goats and blackberry-control on hill country: Notes on management in Waimea County, 9.
- Gorse, eradication of, 270.
- Grading of butter and cheese, uniformity in, 69.
- Gratings of butter and cheese, 1924-25, 139.
- Grain-weevils, control of, 66, 207.
- Granular vaginitis, 71.
- Grapes, protecting against birds, 414.

- Grassland, hill-country, in the North Island, 80.
- Grass-mower, manipulation of, 104.
- Greenwood, F. W.—Liming and top-dressing experiments in Marlborough, 164.

H.

- Hamblyn, C. J.—
Albany Experimental Area, 1924-25, 483.
- Farmers' field crop competitions: Mauku and Patumahoe districts, 120.
- Subterranean clover in paspalum pastures, 234.
- "Hay tea" for calf-rearing, 203.
- Herd-testing in New Zealand, 1924-25, 209.
- Hides, condition of, 396.
- High-grade cheese and the British market, 395.
- Hilgendorf, F. W.—Improved strains of New Zealand oats, 93.
- Hilgendorf, F. W., and C. L. Gillies—Notes on some manurial experiments in Canterbury and Otago, 220.
- Hill-country grassland in the North Island, 80.
- Holly Oak's Annie, 225.
- Holly Oak's Annie: The Jersey champion's record, 393.
- Hopkins, Isaac, 131.
- Hopkirk, C. S. M.—
Contagious mammitis vaccines, 159.
- Genital diseases of cattle, 71.
- Hops, the British market for, 347.
- Hops exports, 278.
- Horticultural education, 201.
- Horticulture Division—Pests in imported bulbs, 312.
- Horticulture (monthly notes), 61, 132, 265, 340, 409.
- Hudson, A. W.—Concrete work on the farm, 286.
- Hudson, A. W., and Ward, F. E.—Pasture top-dressing in Canterbury, 17.
- Hyde, W. C.—Horticulture (monthly notes), 61, 132, 198, 265, 340, 409.

I.

- Importation of fertilizers: Quarterly returns, 139, 347.
- Importation of pedigree stock into Great Britain, 69.
- Improved strains of New Zealand oats: College Algerians, Duns, and Danish, 93.
- Incidence of apple-canker (*Nectria Galligena* Bres.) in New Zealand, 102.

- Incidence of foot-and-mouth disease, 394.
- Internal parasites of sheep: Lung-worm and stomach-worm, 98.
- Inventions of agricultural interest, 63, 206, 349.
- Iron-ammonium citrate, making, 269.

J.

- Jersey champion, a new—Holly Oak's Annie, 225.
- Jersey champion's record, the: Holly Oak's Annie, 393.

K.

- Kennedy, R.—Co-operative dairy companies and their shareholders, 167.
- Kikuyu-grass, range of, in New Zealand, 392.
- Killings at meat-works, season 1924-25, 418.

L.

- Lambing, estimates of the season's, 420.
- Lambing, season's: North Island estimate, 350.
- Lambing-pens, 124.
- Lamb-raising, fat, 226.
- Lambs, lameness in, after docking, 343.
- Lambs, renal congestion in, 268.
- Lampas, horse with, 137.
- "Land legislation and settlement in New Zealand," 419.
- Leighton, F. T.—Limestones for agricultural use, 175.
- Lettuce, growing of early, 68.
- Levy on export fruit, 227.
- Lice on calves, 413.
- Lice on pigs, treatment for, 346.
- Limestones for agricultural use: Notes on some recent samples, 175.
- Liming and top-dressing at Winton Experimental Area: Botanical analysis of pasture, 107.
- Liming and top-dressing experiments in Marlborough, 164.
- Linseed-growing, 191.
- List of qualified veterinary surgeons, 140.
- Live-stock Division—
 - Contagious mammitis of cows: Interim report on trials with reputed preventive vaccines, 159.
 - Estimates of the season's lambing, 420.
 - Fat-lamb raising: An outline of New Zealand methods, 228.
 - Rabbit-poisoning by strychnined thistles, 236.
 - The cattle-tick, 342.

- Live-stock in New Zealand, 1925, 415.
- Loose smut of wheat: A comparison in germination and percentage infection between "first" and "seconds" seed, 161.
- Lucerne-fed ewes and lambs, 155.
- Lucerne stand, strengthening a, 414.
- Lung-worm of sheep, 98.

M.

- Macrocarpa-cypress plantation, thinning a, 272.
- Mammitis, contagious, trials with reputed preventive vaccines, 159.
- Manuka hill country, clearing and grassing, 67.
- Manurial experiments in Canterbury and Otago, notes on some, 220.
- Marrows and pumpkins, cattle, 345.
- Marton Experimental Area: Notes on operations, 1924-25 season, 115.
- McGillivray, R.—Liming and top-dressing at Winton Experimental Area: Botanical analysis of pasture, 107.
- Meat slaughtering and selling by farmers, 344.
- Milk-sediment testers, 347.
- Milk, variations in the percentage of butterfat in, 110.
- Mineral elements in the feeding of stock: Their vital importance, 352.
- Moumahaki State Farm, closing of, 208.
- Mowing of pastures and manipulation of the grass-mower, the, 104.
- Mushroom-culture, 202.
- Mushroom-spawn, planting, 343.
- Mutton, light-weight, demand for, 97.
- Myers, J. G.—The Second Imperial Entomological Conference, 371.

N.

- Nauru and Ocean Islands phosphate: Position of the State undertaking, 141.
- Neill, J. C.—
 - Stinking-smut of wheat, III, 24.
 - Loose-smut of wheat, III, 161.
- New Jersey champion, a—Holly Oak's Annie, 225.
- New Zealand Institute Science Congress, 1926, 417.
- Nitrate of soda and pasture top-dressing, 136.
- Notes on some manurial experiments in Canterbury and Otago, 220.
- Noxious weeds orders, 79, 235.
- Nurseries, registration of plant, 347.

O.

- Oat crop, self-sown, 346.
 Oat and wheat trials at Winton Experimental Area, season 1924-25, 79.
 Oats, improved strains of New Zealand—College Algerians, Duns, and Danish, 93.
 Oats and wheat, estimated areas under, 350.
 Ocean and Nauru Islands phosphate, 141.
 Orchard, the (monthly notes), 54, 126, 192, 260, 334, 402.
 Orchards, commercial, 342.

P.

- Parchment paper for export butter, 65.
 Paspalum for Takaka district, 136.
 Paspalum pastures, subterranean clover in, 234.
 Pasture, botanical analysis of, at Winton Experimental Area, 107.
 Pasteurellosis, 374.
 Pasture top-dressing experiments in Canterbury, 17.
 Pastures, mowing of, 104.
 Pasture top-dressing trials at Te Kumi: Further progress results, 88.
 Paton, W. N.—Variations in the percentage of butterfat in milk: Summary of the investigation, 110.
 Patterson, T. H.—
 Pasture top-dressing trials at Te Kumi, 88.
 Puvera Experimental Area: Development from gum-land heath to dairy farm, 303.
 Paynter, L.—The orchard, 54.
 "Pea" in the teat, 412.
 Pear-midge parasites, 148.
 Pests in imported bulbs: Packing and transit tests initiated, 312.
Phormium tenax, cultivation of, 204.
 Phosphate, Nauru and Ocean Islands, 141.
 Phosphates or bonemeal for cows, 345.
 Pigs with nasal catarrh, 270.
 Pigs sucking heifer, 134.
 Pigs, destruction of wild, 349.
 Poisoning of stock, 188, 278.
 Polled Angus cattle for high tussock country, 202.
 Potatoes, areas under, 350.
 Potatoes, prevention of early blight in, 68.
 Poultry-keeping (monthly notes), 56, 128, 194, 262, 336, 404.
 Preservatized and non-preservatized butter: Experiment in relative keeping-quality, 157.
 Pure-breeding and cross-breeding of poultry, 337.
 Puvera Experimental Area: Development from gum-land heath to dairy farm, 303.

R.

- Rabbit districts, 278.
 Rabbit - poisoning by strychnined thistles, 236, 414.
 Ragwort poisoning, 148.
 Ragwort trouble with cattle, 135.
 Range of Kikuyu grass in New Zealand, 392.
 Rape, experiments on manuring of, in Canterbury, 308.
 Rearing and fattening of geese, the, 182.
 Renal congestion in lambs, 268.
 Raspberries, fertilizers for, 204.
 Rice, W. H.—Citrus-culture, 55, 127, 193, 261, 336, 403.
 Ruakura Farm Training College, 419.
 Rushes, grub attacking, 343.

S.

- Science Congress, New Zealand Institute, 1926, 417.
 Scott, M. J.—Trials with artificial farmyard manure at Lincoln, 256.
 Seasonal notes (monthly), 52, 122, 189, 257, 331, 399.
 Second Imperial Entomological Conference, the: Insects and the welfare of man, 371.
 Seed-exports to Canada, certificates on, 419.
 Settlement in New Zealand, 419.
 Shearers' accommodation, 386.
 Sheep country, deficient, 413.
 Sheep, interim return of, 1925, 30.
 Sheep, internal parasites of, 98.
 Sheep returns, 321.
 Sheep returns, annual, 1925, 276.
 Show fruit, standardized rules for judging, 13.
 Shows, forthcoming agricultural, 208.
 Silage and the quality of milk, 285.
 Silver-blight, 413.
 Simmonds, J. A.—Eucalypts for electric power transmission poles, 20.
 Singleton, W. M.—
 A new Jersey champion—Holly Oak's Annie, 225.
 Dairy-herd testing in New Zealand, 1924-25, 209.
 Holly Oak's Annie: The Jersey champion's record, 393.
 Testing of purebred dairy cows (C.O.R. tests), 32.
 Uniformity in grading of butter and cheese, 69.
 Six-horses team versus tractor in Canterbury, 149.
 Smallfield, P. W.—
 The mowing of pastures and manipulation of the grass-mower, 104.
 Smith, J. M.—Marton Experimental Area: Notes on operations, 1924-25 season, 115.

Smut, loose, of wheat, 161.
 Spraying plants, stationary, for the orchard, 279.
 Standardized rules for judging show fruit: Amended lists and score-cards, 13.
 Stationary spraying plants for the orchard: Some initial local experiences, 279.
 Statistics, live-stock and crop, interim, 140.
 Sterility, temporary, of cattle, 71.
 Stock, mineral elements in the feeding of, 352.
 Stock, pedigree, importation of, into Great Britain, 69.
 Stock slaughtered, 1924-25, 35.
 Stratford Demonstration Farm: Notes on work in 1924-25, 172.
 Strawberry-growing, 270.
 Strawberries, mulching and manuring of, 203.
 Stinking-smut of wheat: III. Field germination of seed treated with formalin and Clarke's Wheat Protector, 24.
 Stomach-worm of sheep, 98.
 Strychnined thistles, rabbit-poisoning by, 236.
 Subterranean clover, 412.
 Subterranean clover in paspalum pastures, 234.
 Sugar-beet, 157.
 Superphosphate and lime, mixing, 202.

T.

Teazle, fuller's, cultivation of, 185.
 Te Kumi, pasture top-dressing trials at, 88.
 Testing of purebred dairy cows (C.O.R. lists), 32, 186, 322.
 Testing of New - Zealand - grown wheats: Results for the current year, 296, 375.
 Thorp, J. H.—The orchard (monthly notes), 126, 192, 260, 334, 402.
 Tobacco-growing, 62, 134, 200, 267, 341, 411.
 Top-dressing and liming at Winton Experimental Area, 107.
 Top-dressing and liming experiments in Marlborough, 164.
 Top-dressing dry grassland, 135.
 Top-dressing experiments on pasture in Canterbury, 13.
 Tractor versus six-horse team in Canterbury: Notes on farm-school discussion at Methven, 149.
 Tree-planting in 1924-25, 69.
 Trials with artificial farmyard manure at Lincoln, 256.
 Tuberculosis, bovine, 272.
 Turnips, broadcasting, 271.
 Twitch, eradicating on small farm, 344.

U.

Uniformity in grading of butter and cheese, 69.
 University education in agriculture: Views of Royal Commissioners, 387.
 Use of the Baumé hydrometer in wine and cider making, 29.

V.

Vaccines, reputed preventive, for contagious mammitis, 159.
 Valentine, G. M.—Acidity-reduction in cream for buttermaking, 1.
 Variations in the percentage of butter-fat in milk: Summary of the investigation, 110.
 Veterinary surgeons, list of qualified, 140.
 Viticulture in New Zealand, 321.

W.

Waimaunga Experimental Farm: Notes on operations, season 1924-25, 228.
 Ward, F. E.—Ashburton Experimental Farm: Notes on operations, season 1924-25, 152.
 Ward, F. E., and Hudson, A.W.—Experiments on manuring of rape in Canterbury, 308.
 Pasture top-dressing in Canterbury, 17.
 Water-content of export butter: Results of testing for year 1924-25, 184.
 Wax-moth, 340.
 Wax-moth and its control, the, 26.
 Weather records (monthly), 64, 138, 205, 273, 348, 416.
 Weights of fat sheep and lambs, 158.
 Wheat and oats, estimated areas under, 350.
 Wheat and oat trials at Winton Experimental Area, season 1924-25, 79.
 Wheat, stinking-smut of, 24.
 Wheats, testing of New - Zealand - grown, 296, 375.
 Wild white clover at Marton Experimental Area, 118.
 Winter feeding of milking - cows: Ration tests at Otaki Sanatorium Farm, 181.
 Winton Experimental Area, 79, 107.
 Woodfin, J. C.—Use of the Baumé hydrometer in wine and cider making, 29.
 Wool-bales, branding, weighing, and booking of, 333.
